

Project Manager

Description:

Blur is an innovation and product development consulting firm serving the healthcare, consumer, and industrial markets. We hire talented individuals with a passion for delivering results who know how to design, develop and deliver products. Our clients encompass a broad variety of markets and technologies, and we value team members who are versatile and able to quickly adapt to new challenges.

We are currently searching for a Project Manager with experience in product development to join our office in Cary, NC. The ideal candidate will demonstrate a history of successfully managing projects, creative problem solving, and technology and engineering acumen. Excellent communication and interpersonal skills, and a passion for product development are essential to our team.

Job Type:

- Full-Time Employee

Key Responsibilities:

- Lead, coordinate, and drive project planning and project management
- Will be involved in projects at all stages, from crafting proposals through design and manufacturing
- Develop and monitor project plans with timelines/milestones
- Participate in concept brainstorming meetings
- Responsible for building and maintaining positive client relationships
- Author design controls documentation for medical devices
- Lead regular update meetings for both staff and senior management to ensure project status is well understood

Skills/Qualifications:

- BS, preferably in an engineering discipline; PMP certificate a plus
- 5+ years of project management experience
- Highly proficient in MS Project, Smartsheet, or similar project management tools
- Familiarity with quality systems, preferably under ISO 13485
- Positive attitude and ability to interact with all levels of Blur team to coordinate and execute R&D activities
- Fluent in engineering of electromechanical systems, particularly medical devices
- Familiarity with a variety of manufacturing processes
- Excellent verbal and written communication skills
